PSIA-AASI Alpine II Movement Analysis & Technical Understanding Prep Clinic Outline

Title: Alpine II Prep MA & Tech Understanding

Duration: 12 hours (12 CEUs)

LCM Highlight: Technical Skills

Course Description:

Ski a variety of Alpine II activities, variations and task chains to explore movement pattern identification and technical understanding discussions and questioning. Geared for current Alpine I instructors working toward Alpine II and those looking to improve their Movement Analysis and Technical Understanding skills. Work with clinic leaders and peers to prepare for teaching in the intermediate zone and the Alpine II assessment. Ski beginner, intermediate, and advanced terrain suitable for an Alpine II assessment.

Recommended Preparatory Learning Resources:

- Alpine Technical Manual

Prerequisite Course(s) and Skills

- Alpine I Certification
- Safely ski all terrain through easy Black terrain
- Possess knowledge of Alpine II Assessment Activities
- Show a desire to enhance personal skill development

Learning Outcomes:

By the end of this course, successful participants will be able to:

- Demonstrate improved personal performance and understanding.
- Summarize feedback on your Movement Analysis and Technical skills relative to the Alpine II standard.
- Share an understanding of their path to Alpine II and personal development.

Learning Experiences:

- Ski a variety of Level II activities, variations and task chains to explore movement pattern identification and technical understanding discussions and questioning.
- Discuss and practice tactics for professional success.
- Collaborate with peers and clinic leaders to build a supportive and dynamic environment.
- Relate activities/variations to personal skiing and riding improvement and application of the Learning Connection to other modules, such as people and teaching skills and ski performance.

Materials/Equipment

- NRM Assessment Activities Guide, Level II Movement Analysis and Technical Understanding Assessment Form, Alpine Performance Guide.
- Well-maintained skis that allow you to display a variety of technical skills (see Ski Performance Assessment Activities guide) in the following scenarios: on and off-piste skiing, short through longer radius turns, in various snow conditions.
Recommendations: side cut range 14-20 meters, waist width 75-90mm.
