PSIA-AASI Alpine II Teaching and People Skills Prep Clinic Outline

Title: Alpine II Prep Teaching and People Skills Prep

Duration: 12 hours (12 CEUs)

LCM Highlight: Teaching and People Skills

Course Description:

On Alpine II terrain, observe, develop, and implement teaching segments geared toward the ski improvement of your peers in the group. This clinic is for current Alpine I instructors working toward Alpine II and those looking to improve their teaching and people skills in a performance-focused environment. Work with clinic leaders and peers to prepare for teaching in the intermediate zone and the Alpine II assessment while adapting fundamentals and exploring tactical applications. Ski beginner, intermediate, and some advanced terrain suitable for an Alpine II assessment.

Recommended Preparatory Learning Resources:

- Alpine Technical Manual

Prerequisite Course(s) and Skills

- Alpine I Certification
- Safely ski all terrain through easy Black terrain
- Possess knowledge of Alpine II Assessment Activities
- Show a desire to enhance personal skill development

Learning Outcomes:

By the end of this course, successful participants will be able to:

- Demonstrate improved personal performance in the areas of teaching and people skills.
- Summarize feedback on your teaching and people skills relative to the Alpine II standard.
- Share an understanding of their path to Alpine II and personal development.

Learning Experiences:

- On Level II terrain observe, develop, and implement teaching segments geared toward ski improvement of your peers in the group.
- Discuss and practice tactics for professional success.
- Collaborate with peers and clinic leaders to build a supportive and dynamic environment.
- Relate activities/variations to personal skiing and riding improvement and application of the Learning Connection to other modules, such as ski performance and movement analysis/technical understanding.

Materials/Equipment

- NRM Assessment Activities Guide, Level II Teaching and People Skills Assessment Form, Alpine Performance Guide.
- Well-maintained skis that allow you to display a variety of technical skills (see Ski Performance Assessment Activities guide) in the following scenarios: on and off-piste skiing, short through longer radius turns, in various snow conditions.
Recommendations: Side cut range 14-20 meters, waist width 75-90mm.
